3. Using forceps, flip the insect over and place it on the tip of the small amount of glue on the lego attach point.

4. Make the insect horizontal.

5. Place the label on the pin between the point and the tip of the pin.

How:
1. Place the insect on its back and find where the lego attach point is.
2. Take a paper point (on a pin) and dip the tip in a small amount of glue.

Who: Mature insects that are too small to pin.
